

VCR2 -REFRIGERATION AND AIR CONDITIONING (RAC) SYSTEMS AND INSTALLATION PRACTICE

TWO DAY INTERACTIVE WORKSHOP

The Refrigeration and Air Conditioning (RAC) Systems and Installation Practice courses are aimed at **new comers** wishing to develop into RAC and **project managers** that have responsibility for managing activities in RAC.

If you have no other formal training - this course can add to your competency for becoming an **AC Energy Assessor** and also deliver the necessary refrigerant handling theory knowledge. This is an intermediate level course following on from the VCR1 refrigeration principles Course.

On completion of this training course delegates should be able to:

- Identify various RAC system applications and components;
- Know where to obtain further information and reference material;
- Appreciate the industry standards for commissioning procedures;
- Assess and apply a safe working practice during installation & commissioning procedures; and
- Understand and practice the requirements for Safe Handling of Refrigerants.

Progression Routes – Completion of this course will support delegates in achieving:

- Electrical training courses;
- Air Conditioning Energy Assessors courses;
- City & Guilds 2079 Refrigerant Handling Practical training and online Assessment; and
- This course will support learning of City & Guilds Technical Certificate 6127 level 2 & 3.

The fees for this course are £400 + vat for B&ES members and £525 + vat for non-member companies.
